It may be easier to ask this here. I have a 1.8 test world running with mods,http://ausweiswebsite.net/fuhrerschein-kaufen/ but unlike previous releases, you can't load 1.8.9 mods into the world because of the version check. You also don't seem to be able to http://ausweiswebsite.net/ create 1 .8.9 world and use 1.8 mods. If that is true,http://ausweiswebsite.net/ I'm looking for information that Bibliocraft will have a release for 1.8.1. Sorry for the long post, and thanks for the updates.
